

## International Congress INTERNET AND THE FUTURE OF DEMOCRACY

**Date:** December 19-20

Organized by the Institute for Democratic Governance

What are the metamorphoses underway in the media, in connection with the emergence of digital media and the consequences on public space: extension? fragmentation? Has there been a renewal of politics because of the Internet? What are the new relations between citizens, experts and politics? How can we imagine the future of the Internet (technical evolution, the governance of the Internet, consequences on politics and culture)?
